experience

April 2019 – Dec 2019

CTO @ Solvio

Prague, Czech Republic

- Developed Amos, a recommendation engine for learning resources.
- I used Babel, Webpack, React, Ramda, Styled Components and Apollo Client. On the server I used Neo4J, Apollo Server and Heroku.
- Unfortunately there is an extremely long request timeout for db queries. I have contacted GrapheneDB support about this; until then, only the frontend works.
- Started working on Amos 2.0, which was going to be built using Material UI, Next, Workbox, Apollo, Cordova, DGraph and DigitalOcean.

Sep 2017 – April 2019

Smart Contract Developer @ Gnosis

Berlin, Germany

- Developed the DutchX trading protocol. It is currently one of the most complex contracts on the Ethereum network with no critical vulnerabilities found to date!
- Transitioned into formal verification using the K Framework. Formally verified the GNO ERC20 token.
- Represented the company at meetups & conferences, including EthCC and Devcon. Had talks at Oxford Blockchain Society and EF Berlin.

Mar 2016 – May 2017

CEO @ OXSC.eu

Prague, Czech Republic

- Had a startup with the intentions of developing something like Khan Academy for the International Baccalaureate.
- In the end we organized math camps – totalling about 60 local and 25 international students.

education

April 2017 – Sept 2017

Personal web development bootcamp

Prague, Czech Republic

- I transitioned into web development. I used mainly Freecodecamp and great Udemy courses to learn bash, git, React... Ended up working as a smart contract dev @ Gnosis.

2014 – 2015

Mathematics and Computer Science @ University of Oxford

Oxford, United Kingdom

- Took courses on Design & Analysis of Algorithms, Functional Programming. Member of Oxford Union and Oxford Entrepreneurs.
- Dropped out.
